

Scalefour Society Press Release

New products in Scalefour Stores

The Scalefour Society is very pleased to announce that they have added further products in from the range of Palatine Models to the range available from the Scalefour Stores.

This is part of the Society's strategy of supporting the sale of products developed by Society members that make a valuable contribution towards the goal of more accurate finescale 4mm modelling.

These new additions are:

- Alex Jackson pivot plates without baseplates. The hinged version of the coupling offers several advantages over the original fixed version in that it is adjustable in all directions, it is more positive in operation, doesn't require any form of centre gauge, and is more robust. The pivot plate has been designed so that when mounted the coupling is on the centreline of the vehicle.

These pivot plates are intended to aid the mounting of the coupling to proprietary wagon bodies that have thick floors that do not have sufficient space to mount a full baseplate. The pack contains enough plates to fit AJ couplings to 5 vehicles. The price is £3.00 per fret.

- Rail droppers to help with wiring of track sections. They can be used with either plastic track components, where they are easily soldered to the bottom of the rail, or with the Brook-Smith method of riveted track, where the etched hole of the dropper is passed over the rivet before it is closed. The fret contains 50 droppers and is priced at £3.00.
- Etched nickel silver strips in widths from 1mm to 4mm. These have been produced to meet the demands of modellers for accurately dimensioned materials in the small sizes that are needed. The nickel silver strips are 0.25mm in thickness and each fret gives 4 x 1mm, 4 x 1.5mm, 4 x 2mm, 2 x 3mm and 1 x 4mm strips. The etch frame can also be used to give a further 1 x 2mm and 1 x 4mm strips. The price is £5.00 per fret.

There are photographs showing these items on the website.

These products are now available for both members and non-members to purchase from the Society's the 'on-line' order page. This will be found at:

www.scalefour.org/e-shop/publications.htm

Palatine Models is a fast-growing supplier of parts for finescale modellers founded by a number of members of the Scalefour Society.

Their website can be found at:
